**Wi-Fi**

# Password

**Question:**

How can I access my device, connecting it to Race Studio 3 via Wi-Fi, if I forgot the password?

**Answer:**

Wi-Fi configuration management is different according to the AiM device; it can be performed through the device or using RS3:

**Wi-Fi configuration managed through the device:**

- MXG/MXG 1.2
- MXS/MXS 1.2
- MXP
- MXm
- MXL2
- MyChron5

**Wi-Fi configuration managed through RS3:**

- EVO5

- To manage Wi-Fi configuration through AiM device: press Menu -> WiFi
    o select "WiFi Reset CFG" (for MXx 1.2 devices)/"Reset WiFi Config" (for MyChron5)
    o press "OK".
- To manage Wi-Fi configuration through RS3 with EVO5 switched on and connected
    o double click on the device name
    o enter "WiFi and Properties " layer
    o delete the existing Wi-Fi password
    o transmit the configuration to the device.

Once these operations performed, connect again your device to the PC and set a new password.

N.B.: RS3 asks for the password only if it has been set from another PC.
