How to upgrade EVO5 | MXL2 | MXG | MXS | MXS Strada | MyChron5

Page 1

The firmware of AiM loggers can be upgraded directly from Race Studio 3, following the steps described below.

Please note: the pictures refer to an MXG, but the same procedure applies to other devices as well.

- Run Race Studio 3 software
- Connect the device to your PC through the USB cable or via Wi-Fi
- Click "web updates" icon (the cloud you find on the top right corner) and wait for it to become blue (a white icon indicates the software is checking for updates)

		RaceStudio3	-	3.08.06	-					
	Firmware	ïrmware								
		EVO5	-	01.20.62	-					
		MXG	-	01.18.07	-					
		MXL2	-	01.18.12	-					
		MXS	-	01.18.12						
		MyChron 5	-	01.20.36	-					
		SmartyCam HD		01.03.52						

- If a new firmware is available on AiM server it will be shown bold in the firmware part of the software central page- image below shows that an MXG firmware release is available
- To download the firmware select the related checkbox and click "Download" button

Please remember: an Internet connection is needed to download the firmware file while is not necessary to perform upgrading procedure once the file downloaded.

To know which firmware version is installed on your device click your "Device" icon in the left panel and a pop up message shows you the information.

In case more CAN expansions are connected to your device click "Devices" icon then click on "Firmware tab" and all devices firmware releases are shown in detail.
